**To: JTECH Medical Customers**

**From:** Len Smith, President

**Subject: *We Need Your Written Permission to Continue Sending You Fax Communications***

The recent Federal Communications Commission (FCC) regulation that created the National Do-Not-Call Registry will soon prohibit any person or entity, including JTECH Medical, from sending any fax containing an "unsolicited advertisement" to any person without that person's written permission. Unlike the do-not-call registry, this prohibition applies even when the parties have an existing business relationship (such as exists between JTECH Medical and its customers).

Our fax communications with you are affected by the FCC's regulation because of its very broad definition of an "unsolicited advertisement," which includes "any material advertising the commercial availability or quality of any property, goods or services." The FCC has indicated that this definition even includes notices about upcoming conferences and seminars, membership renewals, new product announcements, etc. As you know, we oftentimes use fax communications to inform you of important offerings that may be of interest to you, or that may affect you or your practice. This rule even applies if you call and request that we fax you this material – ie our products catalog or seminar/tradeshow information. We will need to fax/email you this form, you will need to sign it and fax it back in order to get the material you are requesting!

The result of this rule is that we will no longer be able to send you any fax that may contain advertisements for our benefits, products, or services unless you give us your written permission to do so by completing and returning this form. Permission granted by this form will remain in effect until the undersigned revokes that permission by filing a new form. Please complete the form below.
